

Project: Fly GACA Sales Enablement Multi-Agent System

SECTION 00-strategy

TYPE document

STATUS **active**

OWNER Founder

UPDATED 2026-07-03

Architecture

The system is implemented as a modular Python package `sales_agents/` utilizing the `google-genai` SDK for LLM interactions. It contains:

- Specialized agents grounded in pre-sales playbooks.
- A routing gateway to analyze queries, delegate to agents, and blend responses.
- A command-line interface for interactive simulations.
- A test runner to execute and evaluate predefined queries.

Milestones

#	Name	Scope	Dependencies	Status	Conv ID
1	E2E Testing Track	Define test suite and runner, publish test-ready.md	None	DONE	63c8ee12-cacf-4115-95c1-40fe70792733
2	Codebase Setup & Personas	Create directories, shared config, grounding, agent prompts	None	DONE	df0ac967-6ffb-4e7d-9d56-2da85374601d
3	Routing Gateway	Classify queries, route to agents, blend responses, inject disclaimers	M2	IN_PROGRESS	df0ac967-6ffb-4e7d-9d56-2da85374601d
4	Interactive CLI	Simulate conversational query processing and RFP document generation	M3	PLANNED	TBD
5	E2E Test Pass	Run test runner against routing gateway, pass 100% tests	M1, M4	PLANNED	TBD
6	Forensic Audit & Hardening	White-box testing, Challenger gaps, Auditor check	M5	PLANNED	TBD

Interface Contracts

Routing Gateway

- `RoutingGateway.process_and_combine(query: str, history: list = None) → dict`
 - Returns: `{"routing": list, "response": str, "classification_reason": str}`
- `RoutingGateway.classify_query(query: str) → dict`
 - Returns: `{"agents": list, "reasoning": str, "is_b2b": bool, "is_regulatory": bool}`

Code Layout

- `sales_agents/config.py` : Shared LLM configs and client initialization.
- `sales_agents/agents/base_agent.py` : Base agent class.
- `sales_agents/agents/enrollment.py` : Enrollment Advisor (qualification, objections).
- `sales_agents/agents/cfi.py` : Chief Flight Instructor (regulatory reference).
- `sales_agents/agents/b2b_owner.py` : B2B Account Owner (RFP proposal).
- `sales_agents/routing/gateway.py` : Routing Gateway.
- `sales_agents/cli/interactive.py` : CLI simulation interface.
- `sales_agents/main.py` : Interactive CLI entry point.
- `sales_agents/tests/test_cases.json` : Defined scenarios.
- `sales_agents/tests/test_runner.py` : Verification script.
