

The Office — Master Index

SECTION root TYPE index STATUS **active** OWNER Founder UPDATED 2026-08-19

Every internal document for running Fly GACA, organized into 12 numbered sections (00–11). Last reorganized: 2026-07-03. Index refreshed: 2026-08-16.

How to read this tree. Numbered prefixes keep sections in order; open any section folder to see its files. Polished deliverables are mostly `.docx` / `.xlsx`; working notes, specs, and drafts are `.md`. Filenames are lowercase kebab-case (ASCII) — see the naming convention in [06-operations-it/repo-health-report-2026-06-16.md](#) §6.

Every `.md` doc carries YAML front-matter (`title` / `section` / `doc_type` / `status` / `owner` / `last_updated` / `lang`) and has a **print-ready branded PDF** under `_print/` mirroring this tree (e.g. `_print/02-legal/terms-of-use-draft-2026-06-14.pdf`). To rebuild PDFs after editing: `cd tools/print && npm ci && npm run build` — see [tools/print/README.md](#).

The authoritative master index is also kept as a Google Sheet: `00-strategy/00-master-office-paperwork-index.gsheet`. This `_INDEX.md` is the quick, readable map. A repo-health overview lives at [06-operations-it/repo-health-report-2026-06-16.md](#).

06 — Operations / IT

Digital office setup **plus** product/engineering specs, runbooks, and infra notes.

The specs and runbooks here document the product/engineering work; the actual **code** lives in the separate repositories under the [ay2m](#) account — [ay2m/FLyGACA](#) (the web app *and* its Express backend on Cloud Run, plus the regulatory corpus and content pipelines), [ay2m/Captain-Ade1](#) (the AI flight instructor service behind [captadel.com](#)), and [ay2m/FLyGACA-ios](#) (the native SwiftUI app family) — not in this repo.

templates/

Reusable document starters: tpl-fin-report · tpl-hr-policy · tpl-legal-memo · tpl-ops-runbook · tpl-strat-proposal (.md)

ar/

Parallel **Arabic (Saudi MSA)** localization of the office — mirrors the same 00–11 sections plus `templates/`. Has its own `ar/_INDEX.md` (Arabic master map), `ar/_GLOSSARY.md` (EN↔AR term glossary), and `ar/README.md`. Keep the English tree here and the Arabic tree in `ar/` in sync when documents change.

tools/print/ & _print/

`tools/print/` is the markdown→PDF pipeline (branded Falcon document theme, EN + RTL Arabic); `_print/` holds the generated print-ready PDFs, one per `.md`, mirroring the tree. Rebuild after edits: `cd tools/print && npm ci && npm run build`.
