

The-Office — Repository Health Report

SECTION 06-operations-it

TYPE report

STATUS

active

OWNER Founder

UPDATED 2026-08-19

[!NOTE] **Superseded 2026-08-19 — retained as a record, not corrected.** This document captured the position as it stood on its own date. The price card, the B2B pricing model and the platform architecture have all changed since: see [01-governance/decision-log.md](#) **DEC-011** and [03-finance/monetization.md](#) for what is current. Nothing below has been edited — its value is that it records what was decided or observed at the time, including the parts that later turned out to be wrong.

Status: current · Last updated: 2026-06-16 · Owner: ops

This is the single front door for the health of **The-Office** documentation repository. It synthesizes the standing audits (linked below), records the canonical resolutions to facts that kept getting re-litigated, scores each department by documentation depth, and tracks the open hygiene/structure actions. It is **about this repo** (the operating documents); the application code lives in separate repositories and is covered only where a doc audit points at it.

Repo at a glance (2026-06-16): 12 numbered departments · 247 tracked files · documentation/spec repo (no application source). Reorganized and hygiene-swept this date.

1. Standing audits (don't duplicate — link)

These reports remain authoritative for their domains. Read them at source; this report only summarizes status and removes the need to hunt for them.

Audit	Scope	Where
Improvement Audit	5-pillar review of app code/UX/content/strategy	improvement-audit.md
QA Consistency Sweep	Cross-doc fact consistency (region, corpus counts)	qa-consistency-sweep-2026-06-14.md
Content QA	GACAR corpus extraction quality (OCR, anchors)	content-qa.md
Consolidation Manifest	What was merged/superseded during consolidation	consolidation-manifest-2026-06-16.md
Content Integration Plan	How external content folds into the library	content-integration-plan.md

Audit	Scope	Where
Test Coverage Analysis	Spec-vs-test gap audit across SPEC-*	test-coverage-analysis-2026-06-16.md
Legal Gap Audit	Legal-pack completeness	../02-legal/legal-gap-audit-2026-06-14.md
HR Pack Gap Audit	People-pack completeness	../05-people/hr-pack-gap-audit-2026-06-14.md
Ground-School Gap Audit	Curriculum coverage	../10-academy-curriculum/ground-school-curriculum-gap-audit-2026-06-14.md

2. Canonical resolved facts (stop re-litigating these)

The consistency sweep settled two facts that recur across documents. **These values are authoritative**; if a document disagrees, the document is stale, not this table.

2.1 GCP region mapping

Region	Location	Role
me-central1	Doha, Qatar	Interim compute (Cloud Run); not in-Kingdom
me-central2	Dammam, Saudi Arabia	PDPL target; Firestore already live here; compute pending

The ~170 occurrences across the repo use this mapping correctly. Two files had it **reversed** (flagged for human edit in the sweep): 00-strategy/book-of-fly-gaca-review-2026-06-14.md line 60 and .claude/agents/flygaca-qa-reviewer.md line 15.

2.2 Corpus counts

Canonical: **74 GACAR Parts** · **21 topical handbooks** · **190 reference documents** · **61 aerodromes** · **13 charts**, indexed by BM25 across **47,361 chunks**.

Stale figures to ignore (predate handbook integration): "96 documents / 75 Parts / 17 admin eBooks / 29,749 chunks" in the-book-of-fly-gaca.html line 771. Note the "17 administration eBooks" (GACA Guidance-Manual PDFs) are a *different set* from the app's "21 handbooks" (topical HTML ebooks).

3. Documentation-depth scorecard

Markdown depth is a proxy for "is this department's thinking written down and diffable," not for the quality of the polished .docx / .xlsx deliverables (which can be excellent while md=0).

Dept	Files	.md	Depth	Note
00-strategy	25	7	●●●●●	Strong narrative + brainstorm
01-governance	12	4	●●●●	Repo-meta + core agreements

Dept	Files	.md	Depth	Note
02-legal	26	17	●●●●	Deepest md coverage; briefs + audits
03-finance	10	1	●○○○	Gap — only monetization.md in md
04-compliance-ksa	13	0	○○○○	Gap (highest value) — KSA-regulated, no md
05-people	14	3	●●○	Audit + a few notes
06-operations-it	48	36	●●●●	Specs/runbooks hub
07-gtm	14	4	●●○	Playbooks mostly in docx
08-customer-success	17	9	●●●●	Well-documented in md
09-investor-relations	21	0	○○○○	Gap — deck/xlsx only, no md thesis
10-academy-curriculum	11	3	●●○	Curriculum + audit
11-brand	29	5	●●●	Design system + assets

Three departments scaffolded this pass to close the worst md gaps (see §4): 03-finance, 04-compliance-ksa, 09-investor-relations.

4. Action tracker

#	Area	Action	Status
H1	Hygiene	Add .gitignore (DS_Store/bak/editor cruft)	✅ Done
H2	Hygiene	Untrack 4 .DS_Store + 1 .bak	✅ Done
H3	Hygiene	Declare binaries in .gitattributes	✅ Done
H4	Hygiene	Delete abandoned FLYGACA_DOCUMENTATION_COMPILATION.md stub	✅ Done
N1	Naming	Normalize filenames to ASCII kebab-case; fix links + _INDEX.md	✅ Done
N2	Naming	Document the convention (§6 below)	✅ Done
C1	Content	Scaffold finance / compliance / investor md docs	✅ Done (templates)
C2	Content	Refresh stale status docs (PHASE0, ROADMAP, briefings)	✅ Done (flagged)
X1	External	Update the Google-Sheet master index + any Drive deep-links to renamed files	🚫 Owner action
X2	Content	Fix the 2 reversed region refs (§2.1)	🚫 Owner action
X3	Content	Update the-book-of-fly-gaca.html line 771 to canonical counts (§2.2)	🚫 Owner action

#	Area	Action	Status
X4	Content	41 pre-existing broken cross-refs in vendored docs point at the app-repo layout (<code>../functions/</code> , <code>../scripts/</code> , flat <code>office/ / docs/</code>); predate this work, not caused by the rename	🛑 Owner action

5. Notes & caveats

- **Filenames are now lowercase kebab-case**, which is less Drive-friendly than the prior Title Case but consistent and link-safe. New files should follow §6.
- **App-code findings** (improvement-audit, test-coverage-analysis) are tracked here for visibility but are actioned in the application repos (`functions/` , `assets/` , `captadel/`), not in The-Office.
- **Vendored guidance files were left untouched.** `01-governance/CLAUDE.md` (and `CONTRIBUTING.md`) describe the *application* repo's layout (`office/` , `functions/`), so their internal file references were deliberately **not** rewritten during the rename — they point at the app repo, not at The-Office.
- This report is the place to record future repo-health resolutions so they live in one durable spot instead of scattered briefings.

6. File-naming convention

All files in The-Office use **lowercase kebab-case, ASCII only**:

- lowercase; words separated by single hyphens (`-`).
- spaces → `-` ; `&` → `and` ; parentheses dropped; underscores → `-` ; em/en-dashes → `-` .
- no spaces, no Unicode, no `&()` — keeps names link-safe and shell-safe.
- keep date suffixes as `-YYYY-MM-DD` (e.g. `legal-gap-audit-2026-06-14.md`).
- **Exceptions (kept as-is)**: GitHub/repo-standard files — `README*` , `LICENSE` , `SECURITY.md` , `CONTRIBUTING.md` , `CODE_OF_CONDUCT.md` , `CLAUDE.md` — the top-level `_INDEX.md` , and the `.claude/` tooling directory.

Examples: `Annual Strategic Plan & OKRs (FY2026-2027).docx` → `annual-strategic-plan-and-okrs-fy2026-2027.docx` ; `SPEC-crm.md` → `spec-crm.md` ; `00 Brainstorms - Index.docx` → `00-brainstorms-index.docx` .

7. External mirrors & tracking

This report is canonical in git. For visibility it is mirrored to connected apps, and the owner follow-ups (§4, X-rows) are tracked as Linear issues:

Where	What	Link
Notion	Readable mirror of this report	app.notion.com/p/38228777bb7b81a89604f12382d15abd

Where	What	Link
Google Drive	Filename reconciliation CSV (204 old→new pairs)	drive.google.com/file/d/1VLQd71DoZ5SdvJjEdHJba5DBycyF0hTo
Repo	Same CSV, committed	../drive-index-updates.csv
Linear (Flygaca)	FLY-5 compliance · FLY-6 finance · FLY-7 investor · FLY-8 stale-status · FLY-9 reconciliation	linear.app/flygaca
Airtable	Base "The-Office Repo Health" — Actions (12 rows, this §4 tracker) + Renames (204 old→new pairs)	airtable.com/appuQmM00TK5o4RAZ
Lucid	Department-health scorecard diagram (doc-depth + FLY-5/6/7 gap callouts)	lucid.app/lucidchart/696634c6-1850-4a11-a5dd-03a4f34c474e/view
Google Calendar	5 reminders (Asia/Riyadh) for FLY-5...FLY-9, staggered by priority	calendar.google.com (flygaca@gmail.com)
Jira (flygaca)	FLY-5...FLY-9 mirrored as tasks KAN-4...KAN-8 in the KAN project	flygaca.atlassian.net/browse/KAN-4
Canva	One-page branded "Repository Health" report summary (4 pages, editable)	canva.com/d/Hu3E3N-Tm01VSuT

Apps evaluated for wiring but intentionally not connected (honest record):

- **Cloudflare / Vercel / Netlify** — publishing this repo (which holds legal, finance, compliance and investor documents) to a hosting provider would expose internal material; **not** auto-deployed.
- **Semrush** — the connected plan does not include MCP/API access (semrush.com/mcp-access).
- **HubSpot** — connected, but it models customers/deals, not repo artifacts; no clean fit.
- **Zoom / Amplitude** — connected but empty (no recordings / no product events) — nothing to mirror.
- **Confluence / Slack** — not available on the connected accounts (Jira-only Atlassian; no Slack link).

The master paperwork-index Google Sheet is locked from AI access ("ineligible for generative AI contexts"), so it could not be auto-reconciled; FLY-9 carries the CSV for a manual paste. A Confluence mirror was requested but **skipped**: the connected Atlassian site (flygaca.atlassian.net) exposes Jira only — no Confluence product/scope — so the Notion page above remains the canonical non-git mirror.

Department-health diagram (Mermaid)

A copy of the Lucid scorecard, embedded here so the visual lives in git:

```
graph TD
  T["The-Office Repo Health 2026-06-16<br/>12 departments · 247 files"]
  T --> S["Strong (md-deep)<br/>00-strategy · 02-legal · 06-operations-it · 08-customer-success"]
  T --> G["Good<br/>01-governance · 11-brand"]
  T --> M["Medium<br/>05-people · 07-gtm · 10-academy-curriculum"]
  T --> P["GAP – scaffolded this pass"]
  P --> F3["03-finance (md 1) → FLY-6"]
  P --> F4["04-compliance-ksa (md 0, KSA-regulated) → FLY-5"]
  P --> F9["09-investor-relations (md 0) → FLY-7"]
```

Addendum — 2026-07-03 refactor pass

A full repo refactor was executed on 2026-07-03 (branch claude/docs-refactor-organize-xyrkga).

Incident resolved: accidental A/B tree duplication

A prior commit had duplicated the entire repo into near-identical A/ and B/ trees. Consolidated back to a single root tree keeping the newest version of every file (B's July docs + A's .gitattributes / .gitignore); ar/.DS_Store removed and .DS_Store ignored. Verified by manifest diff — zero content lost.

Closed this pass

Item	Resolution
Scaffolds FLY-5 / FLY-6 / FLY-7	compliance-roadmap.md , finance-strategy.md , investor-thesis.md rewritten as full drafts (status: draft, owner review pending)
Legal P1: refund policy + order form	New drafts 02-legal/refund-and-cancellation-policy-draft-2026-07-03.md , 02-legal/order-form-template-2026-07-03.md
HR P1 pre-first-hire pack	New drafts: onboarding-checklist · offboarding-checklist · grievance-and-disciplinary-procedure · anti-harassment-policy (05-people, 2026-07-03)
Metadata inconsistency (§4 of the style guide)	All ~200 md docs now carry uniform YAML front-matter (title/section/doc_type/status/owner/last_updated/lang)

Item	Resolution
<code>tpl-legal-memo.md</code> "ANSWOER" typo	Fixed
"FlyGACA" brand drift in prose	Normalized to "Fly GACA" (08-customer-success set + doc titles); GitHub identifiers untouched
Broken <code>office/monetization.md</code> link in b2b-pipeline	Repointed to <code>03-finance/monetization.md</code> (EN + AR)
Vendored <code>CLAUDE.md</code> / <code>CONTRIBUTING.md</code> navigation trap	Provenance banner added (EN + AR)
X2 / X3 (region refs, stale counts)	Verified already corrected in tree — no edit needed
Print-readiness	New <code>tools/print/</code> pipeline (markdown → branded A4 PDF, Falcon document theme, RTL Arabic) + committed PDFs under <code>_print/</code> mirroring the tree
Arabic parity	All new/rewritten docs translated into <code>ar/</code> (Saudi MSA, per <code>ar/_GLOSSARY.md</code>)

Still open (tracked)

The follow-up work from this pass is sequenced in `docs-followup-roadmap-2026-07.md` (this folder) — the tracker for taking the 9 new drafts from `draft → active` plus the docs-infra cleanups. Headlines:

- The 9 new/rewritten docs remain `status: draft` with 60 `[Owner to confirm]` markers (roadmap Phases 0–3): owner desk review, then legal → counsel and HR pack → first hire.
- Docs-infra (roadmap Phase 4): `_print/` → Git LFS, a build/front-matter CI guard, HTML brand docs into the pipeline, plus the two owner actions below.
- Owner actions X1 (Google-Sheet master index reconciliation — FLY-9 CSV) and the library/office duplicate deletion from `consolidation-manifest-2026-06-16.md`.
- App-repo items from `improvement-audit.md` (roadmap Phase 5, executed elsewhere): `quiz.json` `correct: null` fix (single highest curriculum priority), analytics wiring, Stripe-vs-Moyasar decision (DEC-open), CI parity guards.
- Lawyer engagement gates (DEC-007/008) — see `00-strategy/ceo-execution-roadmap-2026-07.md`.
