UPDATED 2026-07-03

Purpose

The Voice-of-Customer program is how Fly GACA systematically collects, analyzes, and acts on customer feedback. It feeds the Sentiment dimension of the health score and sustains the targets of **NPS > 50** and **CSAT > 90%**.

Survey Program

Survey	Measures	Scale
NPS	Loyalty / advocacy	0–10 (Promoter 9–10, Passive 7–8, Detractor 0–6)
CSAT	Satisfaction with an interaction	1–5
CES	Effort to get value / resolve an issue	1–7

Cadence & Triggers

Survey	When
NPS	Relationship survey every 6 months; on milestone (post-onboarding, post-renewal)
CSAT	Transactional — after support ticket closure and after training sessions
CES	After onboarding completion and after major feature adoption

Survey Templates

NPS: "How likely are you to recommend Fly GACA to another aviation operator? (0–10)" + "What is the primary reason for your score?"

CSAT: "How satisfied were you with this interaction? (1–5)" + optional comment.

CES: "How easy was it to achieve your goal with Fly GACA? (1–7)" + optional comment.

Segmentation

Analyze results by customer segment (flight schools, charter operators, MROs, commercial operators), plan tier, and health band so themes can be tied to the right playbook and persona (accountable manager, compliance officer, end user).

Analysis

- Track NPS trend and Promoter/Passive/Detractor mix.
- Tag verbatim feedback into themes (value, adoption, support, product gaps, compliance needs).
- Correlate sentiment with the health score and renewal/expansion outcomes.
- Report results in the monthly CS review and in account QBRs.

Close-the-Loop Process

Respondent	Action	Owner	SLA
Detractor (NPS 0–6)	Personal follow-up; route to at-risk playbook	CSM	< 2 business days
Passive (NPS 7–8)	Identify the gap to a 9–10	CSM	< 1 week
Promoter (NPS 9–10)	Invite to advocacy / reference program	CSM	< 1 week

Every product request captured is logged and routed to the product team, and the customer is updated when the loop is closed.

Targets

Metric	Target
NPS	> 50
CSAT	> 90%
Survey response rate	> 30%
Detractor follow-up within SLA	100%
