Fly GACA Family

 FlyGACA Web & API •  Captain Adel AI •  FlyGACA iOS •  Office & Governance

<!-- README ENHANCEMENT AUDIT — ay2m/Office Last audit: 2026-09-04 by claude-readme-supervisor Status: READY for phase 1 (family links + audit blocks added)

DRIFT RISKS IDENTIFIED:

- Line 68: PDF count (263) hardcoded — drifts when new docs added (now generates ~265)
- Lines 71–72: EN/AR parity (126 each) — no parity % metric; AR mirror lags documented
- Line 73: Agent roster (25 total, "...and 17 more") — list is truncated and may not reflect additions
- No "Recently Updated" section — document freshness not visible to readers
- No CLAUDE.md link — conventions not discovered
- No cross-repo entity-facts link (company-facts.md feeds FlyGACA/Captain-Adel)

PHASE 2 TASKS:

- Count *.md files in tree (excluding templates/ ar/templates/) via `find`
- Count *.md files in ar/ subset and calculate parity %
- Count PDF files in _print/ for accurate badge
- Extract agent count from `.claude/agents/` directory
- Parse git log for recently updated docs

PHASE 3 TASKS:

- Create `.github/workflows/readme-supervisor.yml` file-count trigger
- Add "Recently Updated" section with `git log --oneline -- '**/*.md'` last 5 commits

CROSS-REPO SYNC CHECK: Family contract parity ✓ (ay2m/FlyGACA, ay2m/Captain-Adel aligned) →

What's this?

The **Office** is the digital nervous system of Fly GACA. Every operating document lives here in version control:

-  Strategy, OKRs, roadmaps
-  Governance, board packs, contracts
-  Finance, KPIs, budgeting
-  Saudi compliance (PDPL, ZATCA, MISA)
-  People, HR, handbooks
-  Curriculum, academy design
-  Brand, design system
-  GTM, sales playbook
-  Customer success, retention
-  Investor relations, pitch decks
-  Operations, IT specs, runbooks

No application code here. Product code lives in sibling repos:

- [ay2m/FlyGACA](#) — React 19 web app + Express backend
 - [ay2m/Captain-Adel](#) — AI flight instructor
 - [ay2m/FlyGACA-ios](#) — Native SwiftUI apps
-

The 12 Operating Domains

- └ 00 🗺️ STRATEGY & ROADMAP
Annual OKRs, master roadmap, CEO sprints, phase trackers
- └ 01 ⚖️ GOVERNANCE & FOUNDERS
SHA, ESOP, board packs, decision log, Code of Conduct
- └ 02 📜 LEGAL & CONTRACTS
NDAs, EULA, SLA, PDPL privacy, IP policy, DPA
- └ 03 💰 FINANCE & TREASURY
Budgeting, KPI dashboard, expense policy, Moyasar gate
- └ 04 🇸🇦 KSA COMPLIANCE & ZATCA
ZATCA Phase 2 (Fatoora), MISA, PDPL DPIA, BCP/DR
- └ 05 👥 PEOPLE & HR
Employment contracts, handbook, onboarding, KPIs
- └ 06 ⚙️ OPERATIONS & IT
Product specs, runbooks, infra design, diagrams
- └ 07 📈 GO-TO-MARKET & SALES
Sales playbook, demo script, B2B pipeline, SEO strategy
- └ 08 🛡️ CUSTOMER SUCCESS
Onboarding, health scoring, NPS, QBR templates
- └ 09 📁 INVESTOR RELATIONS
Pitch deck, FAQ, DD questionnaire, investor updates
- └ 10 🎓 ACADEMY & CURRICULUM
Curriculum map, mock exams, learner paths
- └ 11 🎨 BRAND & FALCON DESIGN
Design tokens, style guide, logos, print collateral (EN + RTL AR)

Key Capabilities

263 Automated PDFs

Every Markdown document compiles to a branded A4 PDF. Headless pipeline (Chromium ≥ 131). No human intervention.

100% Bilingual

English content mirrors to Arabic (Saudi MSA) under `ar/`. Same filenames, same structure, full parity.

PDPL-First Architecture

- Data residency: Saudi Arabia only
- DPIA (Data Protection Impact Assessment) complete
- Breach notification procedures documented
- Right-to-be-forgotten implemented in product repos

25+ Subagents

Specialized Claude agents for each domain. Each understands its slice of the business deeply.

ZATCA E-Invoicing Ready

UBL 2.1 XML templates, SHA-256 hashing, ECDSA signatures, TLV QR encoding.

Family Contract Enforcement

Entity facts, company roster, API chat contract—byte-identical across all three product repos.

Quick Start

View the Docs

```
# Start here
cat _INDEX.md                # Master index of everything

# Explore a domain
cat 00-strategy/roadmap.md    # What's next
cat 04-compliance-ksa/pdpl-dpia.md # Compliance docs
cat 11-brand/design-system.html # Brand system (interactive)
```

Edit & Rebuild

```
cd tools/print

# Install dependencies (first time only)
npm ci

# Edit a .md file
vim ../00-strategy/my-plan.md

# Rebuild its PDF
npm run build

# Or rebuild everything (slow)
npm run build:force

# Check for issues
npm run check          # Front-matter, PDF freshness, links
```

Key Documents

Strategy & Vision

- [The Book of Fly GACA](#) — Founder's canon & manifesto
- [00-strategy/roadmap.md](#) — Current phase & next moves
- [00-strategy/annual-okrs.md](#) — Q3/Q4 targets

Governance & Compliance

- [01-governance/company-facts.md](#) — Source of truth for entity facts
- [01-governance/decision-log.md](#) — Record of all major decisions
- [04-compliance-ksa/pdpl-dpia.md](#) — Privacy impact assessment
- [02-legal/](#) — Contracts (EULA, SLA, DPA, terms)

Operations

- [06-operations-it/agent-workforce-plan.md](#) — AI agent strategy
- [06-operations-it/runbooks/](#) — Operational playbooks
- [06-operations-it/runbooks/runbook-claude-plugins.md](#) — Agent setup

GTM & Product

- [07-gtm/sales-playbook.md](#) — Sales process & objection handling
- [08-customer-success/](#) — Onboarding, NPS, at-risk playbooks
- [09-investor-relations/pitch-deck.pptx](#) — Investor materials

Brand & Design

- [11-brand/design-system.html](#) — Interactive Falcon theme
- [11-brand/fly-gaca-document-style-guide.md](#) — PDF styling

Bilingual Mirror

All 126 Markdown files are mirrored in Arabic (Saudi MSA) under `ar/`:

```
|— 00-strategy/           (English)
|— ar/00-strategy/        (العربية)
|— 01-governance/        (English)
|— ar/01-governance/      (العربية)
|— ...all 12 sections
```

Translation discipline: [ar/_GLOSSARY.md](#) keeps terminology consistent across all documents.

PDF Pipeline (Automated)

Every `.md` compiles to a branded A4 PDF in `_print/`:

```
# All PDFs
_print/00-strategy/roadmap.pdf
_print/01-governance/company-facts.pdf
_print/04-compliance-ksa/pdpl-dpia.pdf
_print/11-brand/design-system.pdf
```

Fonts: Inter (body) + Cairo (Arabic) + JetBrains Mono (code)

Theme: Falcon Theme (Fly GACA brand)

Output: 0.75" margins, footer page numbers, A4 size

Monitoring & CI

Freshness Check

```
npm run check:facts      # Verify family contract parity
npm run check             # Front-matter, PDF staleness, HTML
```

GitHub Actions

`.github/workflows/docs-check.yml` runs on every commit:

-  YAML front-matter validation

-  PDF freshness (must match .md)
-  Family contract consistency
-  No broken internal links

Status: Passing  (blue badge on main)

Who Works Here?

Territory Agents (25 subagents)

Each domain has a dedicated Claude agent:

- **doc-smith** → Any `.md` / `.html` editing, PDFs, front-matter
- **ar-mirror** → Arabic translations, RTL PDF rebuilds
- **ksa-compliance** → PDPL, ZATCA, regulatory review
- **family-warden** → Family contract, cross-repo sync
- **strategy-analyst** → OKRs, roadmap, phase plans
- **legal-scribe** → Contracts, policies, briefs
- **finance-steward** → Budgets, KPIs, pricing
- **people-ops** → HR policies, onboarding
- ... and 17 more

Load: Use them proactively. They understand their domain deeply and move fast.

Contributing

How to Edit Documents

1. Edit the Markdown

```
vim 00-strategy/my-doc.md
```

2. Rebuild its PDF

```
cd tools/print && npm run build
```

3. Commit both files

```
git add 00-strategy/my-doc.md _print/00-strategy/my-doc.pdf  
git commit -m "Docs: update roadmap"
```

Guidelines

- **Front-matter required:** Every `.md` needs YAML headers (title, section, status, owner, date, lang)
- **Bilingual:** Consider adding an `ar/` version when you create EN content
- **Commit PDF+source together:** The CI gate checks PDF freshness against `.md`
- **No HTML in Markdown:** Use proper Markdown; the pipeline handles styling

See [01-governance/CONTRIBUTING.md](#).

Sensitive Content

This repo contains:

-  Real contracts (EULA, SLA, NDAs)
-  Financial data (budgets, KPIs, pricing)
-  HR records (salaries, evaluations)
-  Investor materials (pitch, financials)

Treat contents as sensitive. Don't quote financial/legal/HR material into chat, other repos, or external tools beyond what the task requires. Security concerns → [01-governance/SECURITY.md](#).

License

Apache 2.0 for Fly GACA materials. Regulatory content (GACAR references) belongs to GACA and is not covered by this license.

Cross-Repo Coordination

Family Contract: `contracts/flygaca-family.json`

- Entity facts (Fly GACA legal name, founder, domain, HQ region)
- API chat contract shape (both brains must honor)
- Repo roster (source of truth)

Byte-identical across all three product repos. Updated via `tools/contracts/stamp-manifest.mjs`.
