OWNER Founder

UPDATED 2026-07-03

Purpose

This playbook standardizes how Fly GACA forecasts, prepares for, and executes contract renewals so the team sustains a **renewal rate > 95%**. Renewals are treated as the natural outcome of demonstrated compliance value, not a last-minute negotiation.

Renewal Forecasting

Each renewal is assigned a forecast category based on health and engagement:

Forecast	Criteria	Action
Commit	Healthy band, champion engaged, value realized	Confirm and process early
Likely	Neutral band, no major risks	Reinforce value, close gaps
At-Risk	At-Risk band or open escalation	Trigger at-risk playbook

Forecasts are reviewed in the weekly CS pipeline meeting and updated as the health score recalculates.

Renewal Timeline

Days to renewal	Activity
T-120	Identify renewal, confirm forecast, review health & usage
T-90	Hold value review / QBR; surface expansion opportunities
T-60	Deliver renewal proposal; align stakeholders
T-30	Finalize terms, secure approvals, handle objections
T-0	Execute contract; confirm continuity of service
T+30	Renewal retro; reset success plan for the new term

Value Reinforcement

Quantify the compliance outcomes delivered during the term:

- GACA audits passed and findings avoided.

- Compliance deadlines met on time via the platform.
- Audit-preparation and document-management hours saved.
- Adoption growth across core modules.

Pull this evidence from the QBR record — see [docs/qbr-template.md](#).

Negotiation Strategy

- Lead with realized value and outcomes, not features or discounts.
- Defend price by tying it to compliance risk reduction (cost of a failed audit or grounded operation vs. subscription cost).
- Offer multi-year terms or tier upgrades in exchange for commitment.
- Hold a clear concession ladder; protect margin and avoid setting precedents.

Risk Mitigation

- Any account in the At-Risk forecast enters the [at-risk playbook](#) immediately.
- Confirm budget owner and procurement timeline early to avoid lapse.
- Map all decision-makers: accountable manager, compliance officer, finance.

Multi-Year Planning

- Propose 2–3 year agreements for Professional/Enterprise accounts with strong health and stable sponsorship.
- Build in expansion checkpoints aligned to the customer's fleet/operation growth and evolving GACA obligations.

Stakeholder Alignment

Role	Interest	Engagement
Accountable Manager	Regulatory accountability, risk	Executive value review
Compliance Officer	Day-to-day compliance outcomes	Usage & outcomes review
Finance / Procurement	Cost, terms, ROI	Proposal & commercial terms

Success Metrics

Metric	Target
Renewal rate	> 95%
On-time renewals (no lapse)	> 90%

Metric	Target
Multi-year contract share	Growing
Net revenue retention	> 100%
