Overview

This guideline captures the Flygaca visual and experiential feel for all office documents produced within `/Users/flygaca/Documents/Fly GACA /The Office/`. It unifies the existing Markdown Document Style Guide with brand-level specifications for Word, PDF, Excel, and PowerPoint, ensuring that every artifact—whether a strategy memo, legal contract, financial model, or deck—embodies Flygaca’s core values: **modern, clean, vibrant, and user-centric**.

The guideline is built upon the *Flygaca Design System* (see `design-system.html` and `design-system.pdf`) and the *Fly GACA Brand Identity Sheet*. It translates UI-focused tokens (color, typography, spacing) into practical document-level styles while preserving the underlying design language.

Principles

Principle	Description	Application
Modern	Clean lines, contemporary typography, purposeful use of vibrant accent colors.	Use Inter/Cairo/JetBrains Mono; avoid ornamental fonts; keep layouts uncluttered.

Principle	Description	Application
Clear	Information hierarchy that guides the eye naturally; consistent visual weight.	Apply clear heading hierarchy; ample whitespace; consistent alignment.
Vibrant	Strategic use of the Falcon theme to highlight key information without overwhelming.	Accent colors (Falcon Blue, Orange, Green, Red, Purple) used sparingly for calls-to-action, alerts, metrics.
User-Centred	Prioritizing readability, scannability, and accessibility for internal and external audiences.	Minimum 14pt body text; WCAG AA contrast; alternative text for images; logical reading order.

Visual Foundations

Color Palette

Flygaca's **Falcon Theme** provides a restrained yet vivid palette optimized for both screen and print.

Color	Hex	Usage Guidelines	Accessibility (WCAG AA on White)
Falcon Blue	#0066FF	Primary accents, hyperlinks, key highlights	✓ 4.5:1
Falcon Orange	#FF6B35	Callouts, warnings, important notes	✓ 4.5:1
Falcon Green	#00C853	Success indicators, positive metrics	✓ 4.5:1
Falcon Red	#FF3D00	Errors, critical alerts, financial negatives	✓ 4.5:1
Falcon Purple	#9D4EDD	Strategic insights, innovation markers	✓ 4.5:1
Dark Charcoal (Body)	#2D3748	Primary body text	✓ 7.2:1
Medium Gray	#4A5568	Secondary text, subtitles	✓ 4.6:1
Light Gray	#718096	Tertiary text, footnotes (≤20% volume)	✓ 3.2:1 (use only for low-emphasis)
Border Gray	#E2E8F0	Tables, dividers, code block backgrounds	N/A
White	#FFFFFF	Document background	N/A

Rules

- Text Color** – Primary text must be Dark Charcoal on White; never pure black (#000000). Light Gray may be used for footnotes or helper text but must not exceed 20% of total text volume.

2. **Accent Limits** – Maximum **2 accent colors** per document section. Falcon Blue reserved for primary actions/links. Falcon Orange limited to **3 instances per page** for high-priority alerts. Falcon Green/Red used **only** to convey clear positive/negative status (never decorative).
3. **Backgrounds** – Main document background White. Code blocks: Border Gray background with 1px padding. Callout boxes: 10 % tint of the accent color (e.g., Falcon Blue → #E6F0FF).
4. **Accessibility** – All text must meet WCAG AA contrast ratios. Never rely solely on color to convey information; pair with icons or text labels. Verify grayscale rendering for printed documents.

Typography

Flygaca employs a three-font system tuned for legibility on both digital and printed media.

Purpose	Font	Weight Variants	Typical Uses
Primary Body	Inter	400 (Regular), 500 (Medium), 600 (SemiBold)	Paragraph text, table contents, list items
Headings & Accents	Cairo	600 (SemiBold), 700 (Bold), 800 (ExtraBold)	Document titles, section headers, callouts
Code & Technical	JetBrains Mono	400 (Regular), 500 (Medium)	Inline code, code blocks, file paths, command output

Hierarchy & Sizing (Point values → approximate pixel values at 96 dpi)

Context	Font	Size (pt)	Size (px)	Weight
Document Title	Cairo	32 pt	43 px	800 ExtraBold
Section Header	Cairo	24 pt	32 px	700 Bold
Subsection Header	Cairo	20 pt	27 px	600 SemiBold
Sub-Subsection Header	Cairo	18 pt	24 px	600 SemiBold
Body Text	Inter	14 pt	19 px	400 Regular
Bold Emphasis	Inter	14 pt	19 px	600 SemiBold
Italic Emphasis	Inter	14 pt	19 px	400 Regular <i>italic</i>
Inline Code	JetBrains Mono	13 pt	17 px	400 Regular
Code Block Body	JetBrains Mono	13 pt	17 px	400 Regular

Special Cases

- **Legal Documents** – Use Cairo 700 for clause numbers (e.g., “3.2.”).
- **Financial Reports** – JetBrains Mono for all monetary figures, account codes, and IDs.
- **Strategy Docs** – Cairo 800 for vision statements and strategic pillars.
- **Accessibility Minimum** – Body text never smaller than 14 pt (~19 px).

Spacing & Layout

All spacing adheres to an **8-pixel grid** to create rhythmic vertical and horizontal harmony.

Unit	Value	Application
Base Spacing	8 px	Margin/padding increments
Line Height	1.5	Body text (21px for 14 pt font)
Paragraph Spacing	16 px	Between paragraphs
Section Spacing	32 px	Between major sections
Block Spacing	24 px	Around code blocks, quotes, tables

Layout Specifications

- **Page Margins**
 - Digital: 40 px (5 units) on all sides.
 - Print: 0.75" (≈54 px) to accommodate binding.
- **Column Width**
 - Optimal readability: 65–75 characters per line.
 - Maximum width for digital documents: 800 px (100 units).
- **Indentation**
 - Lists: 16 px (2 units).
 - Nested lists: +16 px per level.
 - Code blocks: 0 px left indent (full width within container).
- **Horizontal Rules**
 - Height: 1px.
 - Color: Border Gray (#E2E8F0).
 - Margin: 32 px above and below.

Document Structure (Markdown-centric example, adaptable to other formats)

```
# Title (Cairo 800, 32 pt) ← 32 px space below

## Section 1 (Cairo 700, 24 pt) ← 24 px space below
[Body text with 16 px paragraph spacing]

### Subsection (Cairo 600, 20 pt) ← 20 px space below
[Content]

> [Blockquote: 24 px margin top/bottom, 16 px padding, leftBorder 3 px Falcon Blue]

```[language]
[Code block: 24 px margin top/bottom, 16 px padding, Background Border Gray]
```

## Section 2 (Cairo 700, 24 pt) ← 32 px space above

### Iconography & Imagery

- **Icon Style** – Use line-icon set with 2 px stroke, Falcon Blue ( #0066FF ) for active states, Falcon Orange ( #FF6B35 ) for warnings. Icons should be 24 × 24 px (scale to 16 px or 32 px as needed) and exported as SVG for crisp rendering.
- **Image Treatment**
  - Always include descriptive `alt` text.
  - Maximum width: 600 px (digital) or 5 in (print).
  - Preferred formats: SVG (logos, icons), PNG (screenshots, diagrams), JPEG (photographs).
  - Apply a subtle 1px Border Gray ( #E2E8F0 ) outline when images sit on a white background to improve separation.
- **Photography** – Use high-resolution, authentic shots of Flygaca teams, facilities, and customers. Apply a slight warm tilt (temperature +250 K) to align with the Falcon Ivory background ( #F5F2ED ) used in the digital design system, but keep document backgrounds pure white for contrast.

## Component Library (Document Elements)

The following elements constitute the reusable “components” of a Flygaca document. Specifications are provided agnostically; format-specific mappings appear in the **Implementation Notes** section.

### Typography Styles

Style	Font	Size	Weight	Color	Usage
H1 – Document Title	Cairo	32 pt	800	Dark Charcoal ( #2D3748 )	Top-level title
H2 – Section Header	Cairo	24 pt	700	Dark Charcoal	Section heading
H3 – Subsection Header	Cairo	20 pt	600	Dark Charcoal	Subsection
H4 – Sub-Subsection Header	Cairo	18 pt	600	Dark Charcoal	Lower-level heading
Body	Inter	14 pt	400	Dark Charcoal	Paragraph text
Body-Bold	Inter	14 pt	600	Dark Charcoal	Inline emphasis
Body-Italic	Inter	14 pt	400 <i>italic</i>	Dark Charcoal	Inline emphasis
Inline Code	JetBrains Mono	13 pt	400	Falcon Blue ( #0066FF )	File paths, commands

Style	Font	Size	Weight	Color	Usage
Code Block	JetBrains Mono	13 pt	400	Text: Dark Charcoal; BG: Border Gray ( #E2E8F0 )	Code snippets
Caption	Inter	12 pt	400	Light Gray ( #718096 )	Figure/table captions
Footnote	Inter	12 pt	400	Light Gray ( #718096 )	Footnote text

## Color Usage (per element)

- **Headings:** Dark Charcoal; optional accent underline (2 px) in Falcon Blue for H1 only.
- **Body Text:** Dark Charcoal; links: Falcon Blue with underline.
- **Links:** Falcon Blue ( #0066FF ), underline; visited: Falcon Blue 80 % opacity.
- **Table Header:** Background: Falcon Blue 10 % tint ( #E6F0FF ); Text: Dark Charcoal; Bold.
- **Table Body:** Alternating row shade: White / Falcon Blue 5 % tint ( #F3F8FF ).
- **Callout Box:** Background: 10 % tint of accent color (e.g., Falcon Blue → #E6F0FF ); Left border: 3 px solid accent color.
- **Alert Variants** (using blockquote syntax):
  - [!NOTE] – Falcon Blue border, background #E6F0FF .
  - [!TIP] – Falcon Green border, background #E6FFE6 .
  - [!IMPORTANT] – Falcon Orange border, background #FFF8F0 .
  - [!WARNING] – Falcon Red border, background #FFEEEE .
  - [!CAUTION] – Falcon Purple border, background #F7EEFF .
- **Code Block:** Background Border Gray ( #E2E8F0 ); text Dark Charcoal.
- **Horizontal Rule:** 1px stroke, Border Gray ( #E2E8F0 ).

## Layout Structures

- **Single Column** – Default for most documents (memos, reports, proposals).
- **Two Column** – Reserved for specific layouts (e.g., SWOT analysis, pros/cons, glossaries). Column width: 48 % each with 4 % gutter; total width ≤ 800 px.
- **Three Column** – Very limited use (e.g., three-pillar strategy). Each column ≤ 30 %; gutter 5 %.
- **Grid-Based** – For complex tables or dashboards; align to 8 px gutters.

## Lists & List Styles

Type	Marker	Indent	Spacing
Unordered	Hyphen ( - )	16 px (2 units)	8 px between items
Ordered	Number + period ( 1. )	16 px (2 units)	8 px between items
Task List	- [ ] / - [x]	16 px (2 units)	8 px between items
Nested Levels	Increase indent by 16 px per level	Max depth 3	—

## Tables

- **Header Row:** Bold text, background Falcon Blue 10 % tint ( #E6F0FF ).
- **Body Text:** Left-aligned text, right-aligned numbers.
- **Row Striping** (optional): Alternate rows White / Falcon Blue 5 % tint ( #F3F8FF ).
- **Borders:** 1px strokes, Border Gray ( #E2E8F0 ) between cells; no outer border unless required for print forms.
- **Column Width:** Set to fit content; max cell width 80 characters (wrap if needed).
- **Number Formatting:** Use consistent currency symbols, decimal places, and thousand separators.
- **Accessibility:** Ensure header scope; provide summary/caption for complex tables.

## Code Blocks & Technical Content

- Always declare language (e.g., `bash` ).
- Background: Border Gray ( #E2E8F0 ).
- Padding: 12 px top/bottom, 16 px left/right.
- Font: JetBrains Mono 13 pt.
- No line numbers unless required for reference; if used, place in left margin, Light Gray ( #718096 ).

## Callouts & Alerts

Implemented as blockquotes with a colored left border and tinted background (see Color Usage). Use the markdown syntax:

```
> [!NOTE]
> This is a note.
```

For Word/PowerPoint, use a shaded textbox with left accent bar.

## Images, Icons & Media

- **Images:** Insert with `![Alt text](path)` ; set width attribute if needed ( `{width=600px}` in Markdown).
- **Icons:** Prefer inline SVG; fallback to PNG with transparent background. Size: 24 px (height) aligning with line height.
- **Media (Audio/Video)** – Not typical in static documents; if required, embed a QR code linking to the media hosted on Flygaca’s internal portal, with caption “Scan to view video”.

## Hyperlinks & Cross-references

- **Style:** Falcon Blue ( #0066FF ), underline.
- **Hover/Focus** (digital): Underline thickness 2 px, color shift to Falcon Blue 80 % opacity.
- **Cross-reference formatting:** Use descriptive text, never raw URLs.

- Good: [Flygaca Brand Guidelines](https://flygaca.com/brand)
- Avoid: Click here or https://flygaca.com/brand.

## Headers, Footers & Page Numbers

- **Header** (optional): Document title left-aligned, section title right-aligned; font Inter 12 pt, Medium Gray ( #4A5568 ).
- **Footer**: Page number centered, Inter 12 pt, Light Gray ( #718096 ); total pages formatted as "Page X of Y".
- **First-Page Layout**: Often no header/footer for title pages; include confidentiality watermark if needed (Falcon Gray 5 % opacity diagonal).
- **Watermark** (drafts): "DRAFT" in Falcon Blue 45° diagonal, 120 pt, 10 % opacity.

## Accessibility Considerations

1. **Contrast** – Verify all text/background pairs meet WCAG AA (minimum 4.5:1).
2. **Font Scaling** – Ensure documents remain legible when zoom/scale up to 200 %.
3. **Reading Order** – Logical heading hierarchy; avoid skipping heading levels.
4. **Alternative Text** – Every image, icon, or non-text element must have descriptive alt.
5. **Color Blindness** – Do not rely solely on color distinctions; pair with patterns (e.g., table striping) or icons.
6. **Accessible PDFs** – Tag headings, set document language, enable structured tags for tables and lists.
7. **Accessibility Check** – Run built-in checker (Word: "Check Accessibility"; Acrobat: "Full Check") before final distribution.

## Usage Guidelines

### Dos and Don'ts

Do	Don't
Use the Falcon palette accent colors purposefully and sparingly.	Apply multiple bright colors in the same paragraph; create a "rainbow" effect.
Stick to Inter/Cairo/JetBrains Mono for all body, headings, and code.	Mix in decorative fonts (e.g., Comic Sans, Papyrus) or system defaults that deviate.
Maintain 8 px-based paragraph and section spacing.	Use arbitrary spacing (e.g., 10 pt, 24 pt) that breaks the grid.
Align numbers to the right, text to the left in tables.	Center-align numeric columns; hinder quick scanning.
Provide descriptive alternative text for every image.	Leave alt blank or use nonsensical filler like "image123".

Do	Don't
Use semantic heading levels (H1 → H2 → H3) without skipping.	Jump from H1 to H4 to force visual size; misuse heading tags for styling.
Export final versions as PDF/A-1b for archival distribution.	Distribute editable .docx as final when not required; risk version drift.
Include a confidentiality footer when handling sensitive data.	Omit markings on classified or proprietary documents.

## Document-Specific Guidance

### Markdown

- Follow the existing *Fly GACA Document Style Guide* (see `fly-gaca-document-style-guide.md`) as the baseline.
- Extend with the token mappings defined in this guideline (colors, spacing, icon usage).
- Use front-matter YAML for metadata when stored in a repo:

```

title: "Document Title"
type: "strategy"
version: "v01"
last_updated: "2026-06-16"
author: "@username"
tags: [strategy, quarterly]

```

- Validate with `markdownlint` using the Flygaca rule set (line length 100, ATX headings, 2-space list indentation, required language fences, no trailing whitespace, max 3 blank lines).

### Word (.docx)

- **Template:** Use `Flygaca_Doc_Template.dotx` (stored in `/templates/`).
- **Styles:** Map the Typography Styles table to Word styles (Heading 1, Heading 2, Normal, Code, etc.). Set font sizes exactly as specified (pt).
- **Colors:** Define custom theme colors matching the Falcon palette; apply to hyperlinks, table headers, callout shapes.
- **Spacing:** Set "Paragraph → Spacing → Before/After" to 16 pt for paragraphs, 32 pt for sections (use "Multiple" line spacing 1.5).
- **Headers/Footers:** Insert via "Insert → Header/Footer"; use Inter 12 pt, Gray tones as per guideline.
- **Accessibility:** Run "Review → Check Accessibility" before saving.
- **Saving:** Save master as `.docx`; distribute final as PDF via "Export → Create PDF/XPS Document" (choose PDF/A-1b).

## PDF

- **Source:** Prefer exporting from Word or Markdown via Pandoc with Flygaca CSS template (see `pandoc/flygaca.template.html`).
- **Tags:** Enable PDF/A-1b compliance; tag headings (H1-H6), paragraphs, lists, tables.
- **Links:** Ensure URL annotations are present and colored Falcon Blue.
- **Bookmarks:** Auto-generate from headings for navigation pane.
- **Security:** Apply password protection only if required; otherwise leave open for internal sharing.
- **Validation:** Use Acrobat Pro "Accessibility Full Check" and "Preflight" (PDF/A-1b).

## Excel (.xlsx)

- **Workbook Theme:** Create a custom theme with Falcon colors (Accent 1-6 mapped to Blue, Orange, Green, Red, Purple, Gray).
- **Cell Styles:**
  - **Heading:** Cairo 24 pt Bold, Dark Charcoal, Fill Falcon Blue 10 % tint.
  - **Subheading:** Cairo 18 pt Bold, Dark Charcoal.
  - **Body:** Inter 11 pt ( $\approx 14$  px), Dark Charcoal.
  - **Number:** JetBrains Mono 11 pt, Dark Charcoal, format as Currency/Number with 2 decimals.
  - **Warning:** Text Falcon Orange, Fill Falcon Orange 10 % tint.
  - **Success:** Text Falcon Green, Fill Falcon Green 10 % tint.
- **Column Width:** Set to fit content; aim for  $\leq 15$  characters for ID columns,  $\geq 12$  for descriptive text.
- **Row Height:** Default 15 pt; enable "Wrap text" where needed.
- **Tables:** Format as Excel Table with "BandRows" alternating White / Falcon Blue 5 % tint.
- **Charts:** Use Falcon palette for series; apply pattern fills (stripes, dots) for B/W printing; avoid 3-D effects.
- **Print Area:** Set margins to 0.75"; enable "Fit to Page" width if needed.
- **Protection:** Lock structure; allow editing of input cells only.

## PowerPoint (.pptx)

- **Slide Master:** Edit `Flygaca_Slide_Master.master` (in `/templates/`).
  - **Title Placeholder:** Cairo 32 pt, 800, Dark Charcoal.
  - **Content Placeholder:** Inter 18 pt, 400, Dark Charcoal (body); Inter 20 pt, 600, Dark Charcoal (subheading).
  - **Footer:** Inter 12 pt, Light Gray (`#718096`); include slide number and date.
- **Theme Colors:** Define custom colors matching Falcon palette; apply to shapes, smartart, chart series.

- **Background:** White ( #FFFFFF ) for content slides; title slide may use a subtle Falcon Blue gradient (top 10 % height) for visual interest.
- **Spacing:** Use 8 px-derived vertical spacing: set “Line spacing” to 1.5; “Space Before/After” paragraphs to 12 pt (body) and 24 pt (section headings).
- **Images:** Set “Compress pictures” to 150 ppi for on-screen; 300 ppi for print.
- **Accessibility:** Use “Review → Check Accessibility”; set reading order via Selection Pane; add alt text to all images and shapes.
- **Export:** Save as PDF via “Export → Create PDF/XPS Document” (PDF/A-1b) for distribution; keep .pptx for editing.

## Implementation Notes

### Design Tokens

Token Name	Value	Usage
color-falcon-blue	#0066FF	Links, primary accents
color-falcon-orange	#FF6B35	Warnings, callouts
color-falcon-green	#00C853	Success, positive
color-falcon-red	#FF3D00	Errors, negatives
color-falcon-purple	#9D4EDD	Strategy, innovation
color-neutral-dark	#2D3748	Body text
color-neutral-medium	#4A5568	Secondary text
color-neutral-light	#718096	Tertiary text, footnotes
color-neutral-border	#E2E8F0	Table strokes, code bg
color-neutral-base	#FFFFFF	Page background
font-body	Inter, system-ui, sans-serif	Body text
font-heading	Cairo, system-ui, sans-serif	Headings
font-code	'JetBrains Mono', monospace	Code, technical
size-text-base	14pt	Body
size-heading-h1	32pt	Document title
size-heading-h2	24pt	Section
size-heading-h3	20pt	Subsection
size-heading-h4	18pt	Sub-sub
size-code	13pt	Inline & block code

Token Name	Value	Usage
spacing-unit	8px	Base grid
spacing-paragraph	16px	Paragraph gap
spacing-section	32px	Section gap
spacing-block	24px	Around blocks
radius-none	0px	No radius (default)
radius-sm	4px	Small rounded corners (callouts)
shadow-none	none	No shadow
shadow-sm	0 1px 2px rgba(0,0,0,0.05)	Subtle elevation (alert cards)

These tokens can be exported as JSON for use in scripting (e.g., Pandoc filters, Office Open XML generation).

## Word Template Styles

Create a `.dotx` with the following style mappings (excerpt):

- **Heading 1** → Font Cairo, Size 32 pt, Bold, Color Dark Charcoal, Spacing After 24 pt.
- **Heading 2** → Font Cairo, Size 24 pt, Bold, Color Dark Charcoal, Spacing After 16 pt.
- **Heading 3** → Font Cairo, Size 20 pt, Bold, Color Dark Charcoal, Spacing After 12 pt.
- **Normal** → Font Inter, Size 14 pt, Color Dark Charcoal, Line spacing 1.5, Spacing After 12 pt.
- **Code** → Font JetBrains Mono, Size 13 pt, Color Dark Charcoal, Shading Border Gray, Indent Left 0 pt, Right 0 pt, Space Before/After 12 pt.
- **Hyperlink** → Font Underline, Color Falcon Blue, Underline style single.
- **[Custom] Callout** → Shape: Rectangle, Fill 10 % tint of accent, Line 3 pt solid accent, Text Wrapping: Square.

## Excel Cell Styles & Themes

- Define a custom **Theme Colors** file ( `Flygaca_Theme.xml` ) mapping the 12 palette slots to Falcon colors + neutrals.
- Create **Cell Styles**:
  - `TbL_Header` → Font Cairo 14 pt Bold, Fill Falcon Blue 10 % tint, Font Color Dark Charcoal, Border Bottom 1pt Border Gray.
  - `Num_Body` → Font JetBrains Mono 11pt, Number Format `_( * #, ##0.00_ ); _ ( * (#, ##0.00); _ ( * " - " ? ? _ ); _ ( @ _ )`, Fill No Color.
  - `Alert_Warning` → Font Inter 11pt Bold, Color Falcon Orange, Fill Falcon Orange 10 % tint.
  - `Alert_Success` → Font Inter 11pt Bold, Color Falcon Green, Fill Falcon Green 10 % tint.

## PowerPoint Slide Master

- **Title Master:** Background White; Title placeholder as above; optional decorative Falcon Blue rectangle (height 20 pt) at bottom.
- **Content Master:** White background; placeholder text formatting as per Typography Styles.
- **Footer Master:** Inter 12 pt, Light Gray, left-aligned “Confidential – Flygaca”, right-aligned slide number & date.
- **Theme Colors:** Same as design tokens.

## PDF Export Settings

- **From Word:** Options → ISO 19005-1 (PDF/A) compliance; bitmap text when fonts not embedded; create bookmarks from headings.
- **From Pandoc:** `--pdf-engine=xelatex -V geometry:margin=0.75in -V titleblock:true -V fontsize:11pt -V linestretch:1.5`.
- **Validation:** Use `veraPDF` or Acrobat Preflight PDF/A-1b.

## Automation & Validation

- **Linting:**
    - Markdown: `markdownlint -c .markdownlint.json **/*.md`
    - Word: Use `docx-linter` (custom) to verify style names.
    - Excel: Run a VBA script to check that custom thème is applied and no manual overrides exist.
    - PowerPoint: Use Office JavaScript API to validate master modifications.
  - **Versioning:** Enforce file naming pattern `[dept]_[doctype]_[YYYYMMDD]_[v##].[extension]` (see Naming Convention below).
  - **Changelog:** Each document should retain a brief revision log at the end (see example).
-

# Examples

## Markdown Snippet

```
Q3 2026 Strategy Refresh

Vision Statement
> [!TIP]
> Empowering global teams with secure, low-latency connectivity.

Strategic Pillars
| Pillar | Goal | Metric (Target) |
|-----|-----|-----|
| **Secure Edge** | Zero-trust perimeter | `100%` device compliance [Falcon Green] |
| **Low-Latency Core** | Sub-10 ms intra-region | `<10 ms` [Falcon Blue] |
| **AI-Ready Fabric** | GPU-enabled nodes | `200` nodes [Quarterly] |

### ### Word Document Sample

\*(Description for implementers)\*

- **Title**: "Flygaca Q2 2026 Financial Report" (Heading 1, Cairo 32 pt, Dark Charcoal, 24 pt space below).
- **Section**: "Revenue Summary" (Heading 2, Cairo 24 pt, Dark Charcoal, 16 pt space below).
- **Body**: Inter 14 pt, Dark Charcoal, line spacing 1.5.
- **Table**: Header fill `#E6F0FF`, bold Dark Charcoal text; body rows alternating White / `#F3F8FF`; numbers right-aligned, JetBrains Mono 12 pt.
- **Callout**: Shaded box, left bar Falcon Orange (`#FF6B35`), background `#FFF8F0`, text "Note: Figures are preliminary."
- **Footer**: Inter 12 pt, Light Gray, left "Confidential - Flygaca", right "Page 3 of 12".

### ### Financial Report (Excel)

- **Sheet Title**: Cell A1 merged across A:G, "Q2 2026 Financial Performance" (Heading 1 style).
- **Column Headers**: Row 3, fill `#E6F0FF`, bold Dark Charcoal, borders bottom 1 pt Border Gray.
- **Data Body**: Row 4 downward, JetBrains Mono for numbers (`\$1.2M`), Inter for labels.
- **Conditional Formatting**:
  - Green fill (`#E6FFE6`) if Variance > 0.
  - Red fill (`#FFEEEE`) if Variance < 0.
- **Chart**: Column chart comparing Actual vs Forecast; series colors Falcon Blue (Actual), Falcon Green (Positive Variance), Falcon Red (Negative Variance); data labels shown; legend bottom.
- **Page Setup**: Margins 0.75", orientation Landscape, fit to width 1 page.

### ### Presentation Slide (PowerPoint)

- **Slide Type**: Title + Content.
- **Title**: "Q3 2026 Product Launch" (Cairo 32 pt, Dark Charcoal, centered).
- **Content Layout**: Two-column.
  - **Left Column**: Bullet list, Inter 18 pt, Dark Charcoal, line spacing 1.4; check-mark icons (Falcon Green) before each completed item.
  - **Right Column**: Image mockup (max width 5 in), with caption Inter 12 pt, Light Gray, centered below.
- **Footer**: Inter 12 pt, Light Gray, left "Internal Use Only", right slide number "5/12".
- **Transition**: Simple "Fade"; avoid flashy animations.
- **Accessibility**: Alt text for image: "Mockup of new Flygaca edge router UI showing dashboard panels".

### ### PDF Export Example

- **File**: `strat\_proposal\_20260615\_v02.pdf`
- **Properties**: Title set, Author "Flygaca Strategy Team", Subject "Q3 2026 Strategy Proposal", Keywords "strategy, quarterly, proposal".
- **Appearance**: All fonts embedded; headings tagged H1-H3; tables tagged; bookmarks auto-generated from headings; color profile sRGB; PDF/A-1b compliance verified.
- **Security**: No password; permissions allow printing and copying for internal distribution.

---

### ## Changelog

| Version | Date | Description |

```
|-----|-----|-----|
| 1.0 | 2026-06-16 | Initial release - consolidates Markdown, Word, Excel, PowerPoint,
PDF guidelines; introduces design tokens, component library, and implementation notes. |
| (Future) | - | To be updated as the Design System evolves. |
```

---

### ## Appendix: Reference Files

- **Design System**: `/Users/flygaca/Documents/Fly GACA /The Office/11-brand/design-system.html` (HTML) & `design-system.pdf`
- **Brand Identity Sheet**: `/Users/flygaca/Documents/Fly GACA /The Office/11-brand/fly-gaca-brand-identity-sheet.pdf`
- **Existing Markdown Guide**: `/Users/flygaca/Documents/Fly GACA /The Office/11-brand/fly-gaca-document-style-guide.md`
- **Templates Folder**: `/Users/flygaca/Documents/Fly GACA /The Office/templates/` (store `.dotx`, `.xltx`, `.potx`, and Pandoc HTML templates here)
- **Token Map (JSON)**: `/Users/flygaca/Documents/Fly GACA /The Office/11-brand/design-token-map-2026-06-16.md` (contains raw token values for automation)
